HOLLAND ("Extra Prime") BINDER TWINE

HOLLAND Binder Twine
embodies a new treatment
against Insect Cutting,
proved effective in 1931.

HOLLAND Binder Twine
is packed in a good strong
sack which is lashed with
a good usable rope.

HOLLAND Twine comes from Holland, a country that buys
large quantities of Canadian Wheat, Oats, Barley and Rye free
of any Customs duty.

You Do Not Pay More for HOLLAND TWINE
Although it is the BEST Obtainable Anywhere

FOR SALE—Second hand McCur-
mick Deering Coultion cheap for cash,
or terms arranged. Apply to H. G.
Creston, Carmangay, Alta.

Local & General

M. P. Diemert is in town and
will remain during the harvest
as W. H. Bowman is again con-
fined to his bed.

Billie Bozarth is a Champion
visitor.

R. I. Baker and family re-
turned to Champion this week.

Cecil Ray, who has been in
the east for the past two years,
is again in Champion.

Mr. Graham of the Canadian
Bank of Commerce staff was a
week end visitor in Calgary.

Mrs Renaldi and Reno who
have been visiting friends in
B. C. returned to town recently.

Mr. R. Anderson, of Strath-
more has rented the pool hall
owned by E. Latiff.

Mrs. Cowell is visiting at the
home of Mr. and Mrs. A. Lyons
of Barons.

Miss Edna Orr has accepted a
position in a rural school near
Lomond.

WANTED—TWO SCHOOL
girls to room and board.
Apply to Mrs. Alex Goetz.

E. Latiff, who has been a
patient in the Holy Cross Hos-
pital, Calgary, returned to his
home Saturday.

W. H. Miller of Madison,
Indiana is here on his annual
visit looking after crop in-
terests.

Miss Jean Gardiner expects
to leave next week for Bow
Island where she will take
Grade XII.

Mr. and Mrs. Lee Smith are
visitors in this district having
motored here from the Peace
River.

R. D. Ferries and family
returned to Champion Wednes-
day having spent the past two
months in Trochu.

Master Harold and Richard
Fields of Calgary were guests
of Mr. and Mrs. Clapp last
week.

Mr. Dawson, of Calgary, has
been added to the staff of the
Canadian Bank of Commerce
here.

Hail was reported in the
Fireguard district on Monday
totally destroying the gardens
and damaging crops approxi-
mately 20 per cent.

Mrs. Philpott and Miss Lois
Philpott, now residents of the
Peace River country, are at
present guests at the home of
Mrs. Carlson.

Mr. and Mrs. M. W. Dawson,
Mrs. Meters and Mrs. Lawrence,
all of Edmonton, spent a day
with Mr. and Mrs. J. N. Beau-
rier this week on their return
from Helena, Montana.

Mr. and Mrs. Collins and
family and Miss Ada William-
son returned to Champion this
week by the Banff-Windermere
Highway after a holiday spent
in Spokane and points south.

Baby Clinic

Well Attended

Seventeen children were ex-
amined at the Child Welfare
Clinic sponsored by the W. L. at
the home of Mrs. Alecock on
Wednesday afternoon. Of this
number eleven were babies
under two years of age. Six
had no defects whatever. Of
the pre-school age (2-6 years)
children, three had no defects.
Miss R. Elroy was the exami-
ning nurse in the absence of Miss
Davidson through illness.

Heavy Rain

Interrupts Harvest

The work of harvest was inter-
rupted by heavy rains which
fell over the district on Friday
evening, continuing on Satur-
day evening.

Wheat had been delivered to
the local elevators for the past
two weeks. Stubble crop was
being threshed and the yield
was reported from 14 to 18 bus
per acre of No. 1 wheat weigh-
ing 60 to 64 lbs. per bushel.
Wheat threshed on summer
fallow was yielding 20 to 25
The samples so far had been
exceptionally good, being well
colored, free from green kernels
and of good weight. A con-
siderable acreage of wheat has
swathed and straight contin-
ing was general. The binders
were making very rapid pro-
gress and if this interruption
had not come at this time the
harvest would have been well
on the way.

C. Versluys

Hit by Truck

C. Versluys is around on
crutches this week suffering
from a nasty accident which
occurred on the gravel highway
a few rods north of the H.
Smith farm on Saturday even-
ing. It appears that Mr. Ver-
sluys was returning home from
town on horseback when the
horse was struck by a truck,
that was travelling on the
wrong side of the road and
operating only one light. Mr.
Versluys received severe bruises
to the body and legs. The
horse was injured so severely
that it was shot immediately.
The driver of the truck con-
tinued on his way but it was
later learned that the vehicle
belonged to Fred Hutching of
Barons.

We hope subscribers will en-
deavor to remember their sub-
scription dues this fall. Times
are difficult, to say the least,
and if obligations in this re-
quest were anything but very
small amounts the hope of pay-
ment would undoubtedly be
greatly lessened. An ambition
to survive, if possible, through
the winter anyway, is the mo-
tive for the request.

K. R. McLean, R.O., of McLean
& Anderson, Sight Specialist of
224-8th Ave West, Calgary, will
make his monthly visit to
Champion, Friday, Sept. 2nd
at the Drug store.

O. E. Summers reports a
yield of thirty-two bushels to
the acre on stubble threshed
this year. This is quite re-
markable for stubble this year
and at this rate the summer-
fallow should make forty
bushels or better.

Tree Planting Car Is Performing Very Valuable Services For Farmers Of Prairie Provinces

The tree planting car of the Canadian Forestry Association, which left Regina on May 28th, for its annual tour of the Prairie Provinces completed that part of its tour covering points in Saskatchewan on August 8th with a splendid turnout of farming people at Puffer, and on Wednesday, August the 10th, proceeded west on the Coronation branch of the Canadian Pacific Railway to Altam, where the first stop of the present tour in Alberta was made.

Since the tour commenced, 56 towns in Saskatchewan have been visited, 140 lectures held, with a total attendance of 19,942 people. Apart from the large number of people who called at the car during the day to ask questions, the staff visited 100 farm homes, where belts are either well established or a good start made. Two hundred and thirty-two town plantings were visited, and 252 letters of inquiry into various phases of the work answered from the car.

After two, and in many districts, three years, of the very hardest conditions against the successful growth of trees and shrubs, it is most encouraging as well as interesting to note the favourable reaction in tree planting this year. With the coming of a season of a good amount of moisture, preparations are under way this year by both farmers and townships, to give general advice, and to select and beautify their homes, and next spring, it is safe to say, will see more trees set out than in any previous year in the history of western tree planting.

The years of drought and high winds have taught us the value of any type of tree, and have also shown us the kinds which are able to withstand these severe conditions. Except for quick results, the willows, poplars, and maples have had their day as shelter-belt trees, though their ability for rapid growth will always be of use of both for protection, fuel, and fence posts. The future planter will use caragana, ash and elm, our permanent deciduous trees, and most important of all the evergreens, the spruces in particular being adaptable to any and all prairie conditions, and of course, like the pine, affording twelve months protection and beauty.

Not only do trees furnish protection, to the family, the protection, as well as giving beauty, permanence, and increased value to the farm and home, but it is now definitely proved beyond any doubt, that their protection, and ability to hold and conserve moisture will assure us a good garden every year. Even in the worst drought area during the past two and three years, the farmer who had his garden inside shelter-belts received returns from it, while the man who depended on the garden in the open prairie in nearly every case received nothing at all when harvest time came around. On a side line as bees, poultry, and small fruits, a farmer with a success with bees to land protection, and with the great need for the southern farmer raising and growing more of the stuff he needs for himself and family, trees will be greatly used to insure success in this first important step towards independence. In using trees for the protection of field crops, those who have given it a thorough trial claim that taking five year periods, the well protected field will yield one third more, than one without any protection. There are many districts where field beltling will never become necessary, but over large areas of our southern plains the next few years will see extensive field beltling undertaken.

Manchuria contains over 88,000,000 acres of forest, 1,700,000,000 tons of coal and 400,000,000 tons of iron. The annual output of Japan is one million at Pusan and Yantai is about 7,000,000 tons.

The longest elephant trunk on record was 11 feet 5 1/2 inches.

France now has 6,450 rail and tram buses.

"Poor man! You have no coat." Carpenter: "What?" "You have to protect yourself with a piece of wood."—Pagan Dales, Yverdon.

Slinness and Health

Weight Can Be Controlled By Right Food and Exercise

It will surprise no one who has attentively watched modern developments to learn that men are more and more adopting the practice of slimming. They are, in fact, following the lead which their women-kind has given, and with good reason. Since slimming became fashionable women have greatly gained in health and in looks; and their expectation of life has become longer.

Though certain famous actresses—notably Blomack and the late Lord Salisbury—have tended to disfigure, most great men have had a horror of being fat. Byron, the poet, was among the earliest slimmers. Indeed he boasted that in two years he had brought down the weight from 14 stone 7 pounds to 10 stone 8 pounds, which is astonishing enough.

But he lived with an eccentricity that is not demanded of our slimmers. A diet is suggested for them which is much more agreeable than his draughts of vinegar and champagne of tobacco and mastic. With the right food and proper exercises under medical advice (which should never be neglected), man can control his weight; and he is all the better for doing it.—Overseas Daily Mail.

Man a Farm Plan

British Columbia Government Considering Scheme To Alleviate Distress

Careful consideration is being given by the British Columbia Government to a man-a-farm plan as a possible means of alleviating distress this winter without the outlay of large sums of money.

The plan Hon. R. W. Brunh, Minister of Public Works, announced, is that single unemployed men adapted to farm life be placed with farmers throughout the province. The men would receive their shelter and board and possibly a small allowance for their own use. The farmers would receive service, and special courses of instruction would be carried out by the government.

"Her clothes are cut by the best people in town." "And so is she."

The Maoris of New Zealand never cut down a tree without asking its permission.

STORIES NOBODY CAN READ

COOL, SLEEVELESS DRESS WITH A JACKET THAT PROVIDES SMARTNESS AND CHARM

Here's a distinctive model for the woman of heavier build, who realizes the importance of slenderizing features.

The jacket reverses of the bolero jacket ending just above the waistline. It features the bolero bodice. The inverted plait at the center-back of the skirt lines a suggestion of height and narrowness.

A small patterned printed crepe silk is an excellent medium for this slimming model.

For more summery wear, you can make it of a linen twill, polka-dotted or striped fabric.

Style No. 409 is designed for sizes 36, 38, 40, 42, 44, 46 and 48 inches bust. Size 36 requires 4 1/2 yards of 36-inch material with 1/2 yard of 20-inch contrasting.

It's simplicity itself to make it. And you'll be surprised at the small amount it will cost you.

Price of pattern 25 cents in stamps or coin (coin is preferred). Wrap card carefully.

Canadian Farmers Must Maintain Wheat Quality Can Only Be Done By Using Selected Varieties

The nearest competitor of Canadian wheat on the British market is Australian wheat. Canadian wheat commands a premium of from 5 to 10 cents and sometimes 12 cents a bushel more than Australian wheat. Occasionally Australian wheat brings more than Canadian. Canadian wheat and flour is desired by British and European millers to blend with the weak wheat of Europe because of its baking strength. A warning is issued by S. H. Vigor, Field Crops Commissioner of Saskatchewan, to grow only those varieties of wheat that give grain of high quality suitable for the use of European buyers. This can only be done by using varieties that have been selected and bred for high quality. Many varieties are being grown in Western Canada that at the present time and some of them inferior. This wheat is delivered to elevator and contaminates the better kind of grain.

Unfortunately it was necessary to distribute much of this kind of grain for seedling last spring. Farmers, however, have an opportunity to dispose of it gradually, by obtaining pure seed from field inspected crops. These crops trace back to registered seed and can only pass inspection if obtained in a reasonably good condition. A few bushels will soon insure you enough to sow all the wheat acreage on any farm.

The railway companies have agreed to assist the movement of this class of seed by giving seed grain freight rates on it into central cleaning establishments shipped either in sacks or in bulk. This will enable growers with insufficient cleaning facilities on the farm for handling car loads to ship to those warehouses and finance on the grain to assist them in meeting their financial obligations.

Horse Holding Its Own

Among These Difficult Times Find Horses Supply Cheap Power

The last public horse cab in Boston was replaced the other day by a motor car. So, says the New York Herald-Tribune, one more American metropolis has surrendered to the machine age and all its implications of vanished leisure and simplicity.

But the horse, though vanishing, has not altogether vanished. It is still a day since the famous cab was the fastest, gayest vehicle on Gravelly Street or Hastings. But in Montreal one must still take a horse-cab if one wishes to drive round the Mountain. In Washington, sight-seers can still find a few open horse-carriages—relics of another day—while 30 permits for hacks are issued each year in New York.

In the cities, it is true that the horse is going, or that those that remain linger superfluous on the stage. But in the country, it is different. Hard times have given a distinct setback to the mechanization of agriculture, and the horse appears to be holding his own. Dobbin's board oats little Hay and oats can be grown on the farm. But the tractor's fodder must be bought, and cash is scarce.

A recent census bulletin issued from the Bureau of Statistics showed that there were 3,120,000 horses in Canada in 1921, as compared with 3,451,700 in 1921. The decrease was 22,711, or 0.85 per cent, not a surprising decrease when one considers how rapidly mechanization has come to the business of light and heavy trucking in the towns and cities, which now contain more than half the people of Canada. The number of horses, according to the census report, has fallen off in every province, the decrease ranging from 18.11 per cent in Nova Scotia to 8.81 per cent in Saskatchewan.

British Columbia's horse population fell from 61,385 in 1921 to 50,379 in 1931, a decrease of 18.10 per cent.

The bulletin notes, however, an increase in the number of horses in those districts in which a great number of occupied farms are crowded, an indication, it is taken, that the horse remains essential in the newer parts of the country.

Burglars Rob Jail

During Thieves Take Bedding From Unoccupied Cell Cots

Instead of keeping the city jail at Pittsfield, Illinois, locked to keep dishonest persons in, officials are surprised to bar all windows and doors to keep crooks out.

Someone broke into the unoccupied "house-garage" and took all the bedding from the cell cots. Future prisoners cannot be guaranteed the usual accommodations as a result of the theft.

"What a world! To be valetudinarian and get a job working for a fellow who dropped out at the eighth grade.

Empire Marketing Board Operations May Be Extended If Dominions Will Assist

Radium Recovered After Long Search

Precious Mineral Found Among Ashes From Hospital Furnace

A needle of radium worth \$12,000 was accidentally thrown away in a heap of discarded surgical dressings at the Liverpool Royal Infirmary and later found in the hospital furnace.

The precious mineral, enclosed in a rubber-covered platinum case, was used in an operation. As soon as it was discovered that it had been thrown away, the hospital authorities gave orders to stop the residue from the furnace from being taken away.

An electrician was sent for and armed with an electrocope, a device which demonstrates the presence of radium in any quantity, he examined the cinders from the furnace.

Throughout the following day a laborer dug cinders out of the refuse and took them to him.

Nearly every particle of cinder had been examined and the authorities were giving up hope when the leaves of the electrocope moved violently.

Further tests showed that most of the lost mineral was in one cinder.

When the cinder was moved violently from the furnace, it was found to be a train for London and addressed to the National Physical Laboratory at Teddington. It is believed that experts will be able to retrieve the radium after treatment.

Continuation and expansion of the work of the Empire marketing board of the United Kingdom, as a result of the Imperial Conference, is now suggested. It is possible that the work of the board, heretofore largely concerned with pushing the sale of Empire products in the markets of Great Britain, may be extended to include the advertising of United Kingdom commodities in Canada and the other Dominions.

The future of the Empire marketing board, it is intimated, has been the subject of careful consideration by the important Imperial Conference committees on methods of economic co-operation. The matter, with a number of other questions requiring further discussion, may be considered by a special committee, with representatives from all Dominions as well as the United Kingdom, which will continue its work in London. Such a committee would report at least six months, to the various governments concerned.

The view of the various delegations is that the Empire marketing board is doing excellent work. It was not possible, as a result of the conference, to extend that principle. Consequently, it is intimated the ration duties of the board is vanishing.

On the other hand, it is intimated that the work performed by the board is so valuable that its continuation is considered desirable. It is not felt to be equitable, however, that the British taxpayers should be asked to foot the entire bill, as has been the case in the past. Consequently the question arises as to whether or not the board shall be continued, and, if so, in what form it may be reorganized.

As it is, with the dominions who benefit sharing in the cost of maintenance. On the other hand, it might be expanded so as to have representation in the Dominions and paid United Kingdom goods in Dominion markets, as well as Dominion goods in the markets of the United Kingdom. Money for continuing the work of the present board, the end of the present fiscal year has been voted by the United Kingdom government.

This suggestion of outside monetary contribution to the Empire marketing board's upkeep was made at the 1930 Imperial Conference, and is being repeated. At the conference of 1930 it was not made quite clear as to whether the suggested contributions would be restricted to the Dominions or not.

Made Good Time

Bottle Containing Message Flashed in Sonnet That Expected

Thrown overboard from the French liner "France" in mid-Atlantic last September, a bottle containing a message was picked up on the North Devon coast, 1,500 miles from the starting point. "I predict," says the writer, "that when it will be found Jerome will be a well-to-do-lawyer, and Sam a physician." But he did not think the bottle would travel so fast, for the information was a fact that Jerome was eight years old and Samuel 14.

A Welcome Visitor

The Toronto Globe says that Right Hon. Stanley Baldwin, whose sixtieth birthday occurred August 3, showed his strong Canadian feeling by being born in Confederation year.

He spent his sixtieth birthday in Ottawa attending Canada's and his own diamond jubilee celebration. All Canadians will hope that he will not wait another five years before returning again to the Dominion.

CHAPTER XXIX.—Continued.

And then Jean found herself resting against the curve of Blaise's arm, with the roan's powerful shoulders, firm and solid as a rock beneath her.

"All right," queried Blaise, gathering up the reins in his left hand. "Lean well back against my shoulder. There, how's that?"

"It's like an arm-chair," he laughed.

"I am afraid you won't say the same by the end of the journey," he commented ruefully.

But by the end of the journey Jean was fast asleep. She had "leaned well back" as directed, conscious as she felt the firm clasp of Blaise's arm, of a supreme sense of security and well-being. The reaction from the strain of the afternoon, the exhaustion consequent upon her fight through the mist and the fall which had so suddenly ended it, and the rhythmic beat of Orion's hoofs all combined to lull her into a state of delicious drowsiness. It was so good to feel that she need fight, and scheme, and plan no longer, to feel utterly safe.

"To know that Blaise was holding her."

Her head fell back against his shoulder, her eyes closed, and the next thing of which she was conscious was of being lifted down by a pair of strong arms and of a confused murmur of voices from amongst which she hastily distinguished Lady Anne's heartfelt: "Thank God you've found her!"

And then, characteristically practical, "I'll be right with you in five minutes. Blankets and hot-water bottles are all in readiness."

It was the evening of the following day, Jean, tucked up on a cot in the room with her strained ankle comfortably bandaged, had been reluctantly furnishing Blaise with the particulars of her experience at the bungalow. She had been very unwilling to confide the whole story to him, fearing the consequence of the Toronto papers as applied to Burke. A violent quarrel between the two men could do no good, she reflected, and would only be fraught with unpleasant results to all concerned—probably, in the end, securing a painful publicity for the whole affair.

Fortunately Blaise had been out when Judith had run up earlier in the day to enquire if Jean had returned to Staple, or he might have fired off a few candid expressions of opinion through the telephone. But now there was no evading his searching questions, and he had quietly but determinedly insisted upon hearing the entire story. Once or twice an accusation of intentional concealment from him as he listened, but beyond that he made little comment.

"And—and that was all," wound up

Blaise. "And anyway, Blaise—a little anxious—it's over now, and I'm none the worse except for the acquisition of a little more worldly wisdom and a strained ankle."

"Yes, it's over now," he said, standing looking down at her with a curious gleam in his eyes. "But that sort of thing doesn't happen twice. You'll have to learn me—do you hear?"—imperiously. "You shall never run such a risk again. We'll get married at once!"

And Jean with a quiver of amusement at the corners of her mouth, responded modestly:

"Yes, Blaise."

The next minute his arms were around her and their lips met in the first supreme kiss of love at last acknowledged—of love given and returned.

There was no gauge by which those first moments when two who love confess that they are lovers may be measured. It is the golden, timeless span when "unborn tomorrow and dead yesterday" cease to have any round about and only love, and love's ecstasy, remains.

To Blaise and Jean it might have been an hour—a commonplace period ticked off by the little silver clock upon the chimney-piece—or half eternity before they came back to the recollection of things mundane. When they did, it was across the kindly bridge of humor.

Blaise laughed out suddenly and boyishly.

"It's preposterous!" he exclaimed. "I quite forgot to propose."

"So you did suppose—" smiling up at him impatiently—"suppose you do it now?"

"Not if I won't waste my breath when I might put it to so much better use in reminding you how beloved."

Blaise was silent, but her eyes answered him. She had made room for him beside her, and now he was seated upon the edge of the bed, his feet, holding her in his arms. She did not want to talk much. That still, serene happiness which lies deep within the heart is not provocative of garrulity.

At last a question—the question that had tormented her through all the long months since she had first realized whether love was leading her, found its way to her lips.

"Why didn't you tell me before, Blaise?"

His face clouded.

"Because of all that had happened in the past. You know—you have been told about Nests."

"Ah, yes! Don't talk about it, Blaise," she broke in hastily, sensing his distasteful recoil from the topic.

"I think we must a little, dear," he responded gravely. "You see, Nests was not all to blame—nor even very much, as I'm sure—with a little half-tender smile—"my mother tried hard to make you believe."

Blaise nodded vigorously.

"She did. And I expect she was perfectly right."

He shook his head.

"No," he answered. "The fault was really mine. My initial mistake was in confusing the false fire with the true. It was not love I had for

Nests. And I found it out when it was too late. We were poles apart in everything, and instead of trying to make it easier for her, trying to understand her and to lead her into our ways of looking at things, I only stormed at her. It roused all that was worst in me to see her trailing our names in the dust, throwing her dignity to the winds, craving for nothing other than amusement and excitement. I'm not trying to excuse myself. There was no excuse for me. In my way, I was as culpable and foolish as she. And when the crash came—when I found her deliberately entertaining in my house against my express orders, a man who ought to have been kicked out of any decent society, why, I let go. The Tormarin temper had its way with me. I shall never forgive myself for that."

I frightened her, terrified her. I think I must have been half mad. And then, well, you know what followed. She rushed away and, before anyone could find her or help her, she had killed herself—thrown herself into the Seine. Quite what happened between leaving her and her death we were never here to find out. Apparently since her marriage with me, her sister had gone to Paris, unknown to her, and had taken a situation as "drama de compagnie" to some Frenchman, and Nests, though she followed from Italy to Paris, failed to find her there. At least that is what Margherita Yaldi told me in the letter announcing Nests's death. Then she must have lost her. So you see, morally I am as responsible for that poor, reckless child's death."

"Oh, no, no, Blaise! I don't see that"—pitifully.

"Don't you? I do—very clearly. And that was why, when I found myself caring for you, I tried to keep away."

He felt in his pocket and produced a plain gold wedding-ring. On the inside were engraved the initials "D. T. and M. P." and a date.

"That was my talisman. Margherita sent it back to me when she wrote telling me of Nests's death. When ever I felt my resolution weakening, I used to take it out and have a look at it. It was always quite effective in thrusting me back into my proper place in the scheme of things—that is, outside any other woman's life."

There was an inexpressible bitterness in his tones, and Jean drew a little nearer to him, her heart overflowing with sympathy.

At her and smiled a thought ironically. But now—you've beaten me!"

His lips brushed her hair. "I'm glad to have you see you again."

"I know," he said. "I know."

"I don't know, even now, that I'm right in letting you love me—"

"You can't top me," she objected. He smiled.

"I don't think I would if I could—now."

Blaise leaned up with a tender, dictatorial finger on the side of his face, turned his head towards her.

"Questa sera!" she demanded suddenly. Then, without waiting for his answer: "Blaise, I do love you chin—"

It's such a nice, square, your-money-your-life sort of chin."

Something light as a butterfly, warm as a woman's lips, just brushed the feature in question.

He drew her into his arms, folding them closely about her.

"And I—I love every bit of you," he said hoarsely. "Body and soul. I love you! Oh! Heavens! beloved! Nothing—no one in the whole world again came between us two ever again!"

CHAPTER XXX.

The Gateway

August seemed determined to justify her claim to be numbered amongst the summer months before making her exit. Apparently she had repented her of having recently veiled the country in a mist that might have been regarded as a very creditable effort on the part of November, for today the sun was blazing down on a cloudless sky, sending a breath of wind awayed the nooding cornstalks, heavy with golden grain.

Blaise, her strained ankle now practically recovered, was tramping along the narrow footpath through the cornfield, following in Blaise's footsteps, while Nick brought up the rear of the procession. She had not seen Claire since her engagement had become an actual fact, though a chilly, actually warm-hearted little note from the latter had found its way to Staple, and this morning Jean had declared her inability to exist another day "without a heart-to-heart" talk with Claire."

Hence the afternoon's pilgrimage

You said it!
it pays to
"ROLL
YOUR
OWN" with..

Thousands of delighted smokers say it because they have proved it, time and time again. You can roll at least 50 cigarettes with a 20c. package of Turret Fine Cut cigarette tobacco. And every cigarette you roll will be to your liking. The more you roll, the more you'll enjoy them.

10c and 20c packages
—also in 3 1/2, vacuum tins

FREE Chanticleer Cigarette Papers with every package.

FINE CUT
Cigarette Tobacco

across the cornfield which formed part of a short cut between Staple and Charnwood.

At first Jean had feared lest her new-found happiness might raise a barrier of sorts betwixt herself and Claire. The contrast between the respective hands that Fate had dealt them was so glaring, and the rose and gold with which love had suddenly decked Jean's own life seemed to make the black tragedy which enveloped Claire's appear even darker than before.

But Claire's letter, full of a quiet, unselfish rejoicing in the happiness which had fallen to the lot of her friend, had somehow smoothed away the little uncomfortable feeling of comparison which, to anyone as sensitive as Jean, had been a very real embarrassment. Nick's felicitations, too, had been tempered with frank cordiality and affection, and with a delicate perception that had successfully concealed the sting of individual pain which the contrast could hardly fail to have induced.

It was with a considerably lightened heart that Jean, with her escort of two, passed between the gates of Charnwood, and avoiding the lengthy walk entailed by following the windings of the drive, struck off across the velvet lawns—smooth stretches of close-cropped award which, broken only by branching trees and shrubbery, and unadorned by the dreary formality of symmetrical flower-beds, swept right up to the gravelled terrace fronting the windows of the house itself.

The two men lolled to discuss the points of a couple of young spaniels rolling together on the grass, but Jean, eager to see Claire, smilingly declined to wait for them, and, speeding on ahead, she mounted the short flight of steps leading to the terrace from the lower level of the lawns.

(To Be Continued.)

Build Huge Telescope
Second Largest Telescope in the World To Be Erected Near Toronto

Details of the erection near Richmond Hill, north of Toronto, of the second largest telescope in the world, at an estimated cost of \$500,000, has been made public.

Officials of the University of Toronto to which Mrs. Jessie Dunlop is donating the David Dunlop Observatory in memory of her husband, announced construction would start at once on the two main buildings of the project.

On a circular platform 800 feet above sea level, a round building 61 feet in diameter will be built to house the huge telescope, nearly all parts of which are being made in England. Larger than the one in the Dominion Government observatory, Victoria, B.C., the telescope will be on the reflecting type and will have mirrors weighing 5,000 pounds.

The telescope building at an administration building to be erected at a cost of \$125,000, will be located in the centre of a 177-acre plot, which will be known as the David Dunlop Park.

Counterfeit Coin
Spurious Fifty Cent Pieces Being Circulated At the Coast

The 50 cent piece is in a fair way to pass out of use as legal tender in Vancouver until the flood of counterfeit coins of that denomination is stopped.

One large corporation is stated by police to have taken in more than \$100 worth of the spurious money, facture, bearing the royal Canadian figure, and the Royal Canadian Mounted Police succeeded in arresting and convicting the counterfeiter.

Within a short time, however, coins bearing the dates 1916, 1917, 1918 and of less clever disguise, appeared and have gained wide circulation.

Will Not Revocal Secret
J. D. Ames, retired marine engineer, of Houston, Texas, has turned his hobby into a money-making industry, in spite of present economic conditions. Ames makes small ships and inserts them in quart bottles. He will not reveal his secret of constructing the models in the bottles, but he is able to sell all he can build.

France has 800 manufacturers of agricultural implements, about twice as many as before the war.

Little Helps For This Week

"We then that are strong ought to bear the infirmities of the weak." — Romans xv. 1.

Ask God to give thee skill in comfort's art. That thou mayst condescend to, And set apart Unto a life of sympathy. For heavy is the weight of ill In every heart. And comforters are needed much, Of Christ-like touch.

—Anna E. Hamilton.

They who have undergone and overcome stand with their keys to open the portals of life's great emergencies to their brethren. The wondrous power of experience! And see how beautiful and smooching this makes our sorrows and temptations. Every stroke of sorrow that issues into light and joy is God putting into your hand the key of that sorrow, to unlock it for all the poor souls whom you may see approaching it through all your future life. It is a noble thing to take that key and use it.

—Phillips Brooks.

Persian Balm tones and stimulates the skin. Fragrant as a flower. Cool and soothing. Safeguards and beautifies the most delicately-textured skin. Creates complexion of exquisite beauty. Adds a subtle finish to the daintiest woman. Invaluable for softening the hands and making them flawlessly white. Cool and refreshing. Delicately fragrant. Delightful to use. Chosen unhesitatingly by all women who care for feminine distinction.

Things Not Needed
Rt. Hon. Stanley Bruce would exclude from the Empire "certain foreign products." An exchange suggests that the list include German measles, Chinese puzzles, Russian Reds, Spanish flu, French leave and Dutch treats.

Only two British women, of the 200 women pilots licensed in this country, have been killed while in charge of an aeroplane, states the Royal Aero Club.

Algiers and France have just been connected by radio telephone.

"Baba," made from dates, has become the national drink of Libya.

WORLD HAPPENINGS BRIEFLY TOLD

The will of the late C. G. Kille, safety razor manufacturer, naming his widow as the sole beneficiary was probated at Los Angeles. Attorney said the estate would be in excess of \$1,000,000.

Believed to be the last survivor of the 38th Regiment, which took part in the Riel Rebellion at Cut Knife Creek and Fish Creek in 1885, Sergeant-Major Usebe Beaudoin, 66, is dead at Lachine, Que.

Two thousand five hundred dollars for an individual prize for the best sample of wheat shown at the World's Grain Exhibition next year at Regina, is the largest of its kind ever offered.

Final payment to farmers for all wheat pooled during the 1931-32 season has been made by the Alberta Wheat pool. It was announced by R. D. Purdy, general manager. Total payment amounted approximately to \$200,000.

Automobile on farms in Canada have doubled in the past 10 years and there is now a car for every 2.27 farms, figures issued by the Dominion Bureau of Statistics show. There are 726,623 farms in the Dominion and on them 321,906 automobiles.

There are 5,651,411 single persons in Canada and 5,971,198 married. It is revealed in census figures on conjugal conditions released by the Dominion Bureau of Statistics. Of the population of 10,374,350, male number 5,374,451 and females 5,002,245.

Preserving Fish By Brine-Freezing Method

Process Used In Scotland Has Been Gratifying Success

Brine-freezing, a new method of preserving fish caught in the sea, the result of research work carried out at the Torry Research Station, Aberdeen, is regarded as a gratifying success and an exhibition of cod, sole, halibut, plaice and rock salmon frozen by this process was given recently at the Department of Scientific and Industrial Research, London.

The fish had been caught by the research vessel "City of Edinburgh" weeks previously. Some of them were fried at the department and guests enjoyed an early luncheon of fried fish at the government's expense.

This new process will, it is claimed, revolutionize the methods of preserving fish. Trawlers will brine-freeze fish as they are caught instead of, as at present, storing them in ice while the trawler is at sea. A Lunney, superintendent of the Torry Station, said that one of the disadvantages of fish frozen under old methods had been that it was not ultimately nice to eat.

In the brine-freezing process the fish are dipped into a solution of sodium chloride (or brine) carried on board in a tank at a temperature of five degrees Fahrenheit. Then they are stored at a temperature of five degrees, and experiments have shown that fish so treated can be kept in perfect condition for three months.

The cost of installing the new plant on board is about \$25,000, but it is claimed there would be a real saving, because of the avoidance of loss on fish caught early in the voyage. A Billingsgate fish merchant says the brine-frozen fish was almost as good as freshly caught fish.

Lacked Vision

Hotel Proprietor—"Now, over there is the sea."

Copy Writer—"Where? I can't see it."

Hotel Proprietor—"You can't." My dear sir, I'm afraid you're not the man we want to write our advertisements."

Another Scotsman died as a result of a broken heart in Edinburgh last week. It seems that his doctor insisted that he give up smoking just after he had had his cigarette lighter refilled.

"What would you like, sir?"
"One lemonade—and three straws."
—Buen Humor, Madrid.

W. N. U. 1936

An Important Industry

Demand For Lobsters From Canadian Waters Is Growing

The lovely lobster has climbed to a high place of importance among Canadian industries and offers one of the brightest spots on the Dominion's business horizon, according to a bulletin just released by the Department of Immigration and Colonization of the Canadian Pacific Railway.

"Both in the United States and Great Britain, demand for lobsters from Canadian waters has been growing and the industry is in a healthy state," the bulletin stated. "Lobsters now are second only to salmon as the most important fishing enterprise in Canada, the salmon industry being centered largely in British Columbia and the lobsters coming chiefly from the Atlantic coast near Halifax, N.S."

The bulletin told of a new record for a single shipment of canned lobsters which recently was made to Great Britain. The shipment contained 10,000 cases and was valued at \$200,000.

Novel Use For 'Planes

Japanese Army Machines Search For Active Volcano

Japanese army "planes" were put to the novel use of scouting for an active volcano. Reports came to Harbin that an extinct volcano in the Hinggan range to the west had suddenly become active. Rumblings were reported as heard in a place 25 miles away from Harbin. The "planes" failed to locate any evidence of eruption. Russian scientists reported 13 volcanoes in the Hinggan range back in the 18th century.

Eliminating Noise

Milk Concern In New York Is Doing Its Bit

A large milk concern serving New York City has actively entered upon a noise abatement campaign. By equipping its horses with rubber cushions for their shoes, and providing its drivers' milk bottles with rubber shock-absorbers, it plans to lessen the din of early morning milk deliveries.

A necropolis is a burial ground, usually of great size, or one found near the site of an ancient city.

Most fittingly, the vital new link in the Great Lakes' system, Canada's \$128,000,000 Welland Canal, was opened, officially, by sending the greatest grain-carrier afloat, S.S. Lemoyne of Canada Steamship Lines, through the eight locks to Kingston with the biggest cargo of western wheat moved

Photos show: top left: Rt. Hon. Stanley Bruce, of Australia; Rt. Hon. Stanley Baldwin; His Excellency, Earl Bessborough, and Rt. Hon. R. B. Bennett with two members of the Indian delegation at the canal ceremonies. Left center: the giant 630-foot S.S. Lemoyne passing under one of the canal 120-foot electric lift bridges. Right center: marking the inauguration of a new eastern deep-water terminus for grain at Kingston and the fact that only 200 miles of river navigation now remain to reach the export port of

A Big Cargo

Lake Vessel Carries Enough Wheat To Bake 12,500,000 Loaves

An old salt sat on the bank of the new Welland Canal. Beside him sat the statistician. Talk veered uncertainly from one subject to another. Then it reached record cargoes. "And the statistician got busy."

When the "Lemoyne" opened the canal, she carried the world's greatest cargo of grain, he said. "She has already carried 571,885 bushels of wheat at one load, and that cargo would make 12,500,000 two-pound loaves of bread. If you laid these loaves end to end they would reach 2,300 miles for the distance from the spot where the wheat was produced to the sea. It would take 210 farms of 10 acres to grow the cargo and 286,000-ton railroad cars, or a train 2 1/2 miles long to carry it!"

"Well," said the old salt, tapping his pipe reflectively against the snubbing post, "that's quite a load. I remember when the first steamboat—'Theerin'—pulled out of Port Arthur with her record cargo. It was 30,000 bushels."

Britain Perfects Super-Tanks

Much Stronger and More Efficient Than Old Type

Great Britain was the first nation to use "tanks" in warfare. Since then these instruments of destruction have been greatly improved so that England leads the world in such weapons. The latest tanks are covered with armour plate much stronger than before and capable of resisting even the new German super-bullet, which blasts its way through the armour of the old-type tanks. They have also received a more mobile light tank capable of negotiating ditches, streams, trenches and other gaps much wider than its predecessors could have negotiated.

What It Stood For

A tiny butcher shop recently opened in a Connecticut town; wedged into a small store room, bears the impressive firm name of Williams & Gilchrist, Ltd. Asked what the Ltd. stood for, "Stands for 'limited'." Mr. Gilchrist said. "You see, we're limited to meats and nothing but meats."

"What is a paradox, Mister?"
"Two wharfs side by side, sir."

Utilize White Whales

Hides May Be Used For Manufacture Of Fancy Leather Goods

The two white whales brought to Winnipeg from Hudson Bay by the Industrial Development Board of Manitoba have been rendered at the St. Boniface abattoirs and they provided 35 per cent. of their total weight in excellent quality oil, bearing a slight odor, and being only slightly stronger than olive oil. The board hopes to develop a new industry on the northern water body.

The hides are now in process of tanning which will take some time but leather workers believe it will prove suitable for the manufacture of ladies' handbags, and other fancy leather goods. Minute study of the outer skin reveals a mottled effect with alternating patches of smooth and rough skin. Hides almost two inches thick adheres to the hide, but comes off readily.

A Token Of Gratitude

German Soldier Pays Tribute To Humanity Of American Doughboy

A little silver coin bracelet to commemorate the humanity of an unknown "doughboy" who saved the life of his enemy was recently deposited in America's war museum at West Point.

August Ullrich, late of the Kaiser's army, sent the bracelet from his death-bed and with it this note:

"Before I will have to depart, I intend to fulfill the promise I gave to a soldier of the American army, who saved my life in 1918."

"I therefore lay in your hands a bracelet made out of old German coins as a sign of appreciation for a nation whose soldiers even in war treated their enemies with great consideration."

Artificial Lighting For Office Buildings

Would Provide Uniform Glow Which Is Easier On Eye

Some authorities on illumination contend that the office buildings of the future will be built without windows and will employ artificial ventilation, also artificial lighting throughout, in an effort to secure a uniform glow which will not tire the eye. Any James Richardson & Sons of Winnipeg, at Kingston's new elevator which tests accurately the effect of various lights on the eyes.

OPENED BY WORLD'S GREATEST GRAIN VESSEL

In two years, a load of grain over 150,000 bushels greater than had ever been shipped through the lower lakes in history. The Governor-General, delegates to the Imperial Conference, Rt. Hon. R. B. Bennett and members of the Cabinet all attended the opening ceremonies at Thorold.

Montreal—Mayor G. G. Wright, of Kingston, conferring the freedom of the city on W. H. Coverdale, president of Canada Steamship Lines aboard the freighter on arrival. Bottom: "The practical consummation" of the ceremonies—S.S. Lemoyne prepares to unload her cargo of 532,000 bushels, shipped last week. We tried 'em on our steam last week but had little success. This week we call for peanuts on subscription. This is as far as we are going. Don't want any hickory nuts!"

An unwelcome guest is one of the best things going.

SUNDAY SCHOOL LESSON

AUGUST 23

GIFTS FOR BUILDING THE TABERNACLE

Golden Text: "Honor Jehovah with thy substance, and with the first-fruits of all things increase." —Proverbs 3:9.
Lesson: Exodus 35:4 to 36:7.
Devotional Reading: Psalm 84:1, 2, 12.

Explanations and Comments

The call for contributions for the Sanctuary, Exodus 35:3-20—Moses assembled the people and addressed them, probably from a raised platform. He reminded them that it was God's desire to have a sanctuary where His might meet them and they might offer Him their worship. He called for voluntary contributions of materials and labor for the sanctuary and its equipment, and for the vestments of the priests. There was no restriction; the givers of gifts must be "willing-hearted," and the laborers "wise-hearted." The people listened and quietly went back to their tents.

"You might have wondered whether they would return, since so little had been said to touch their emotions and arouse their enthusiasm. How different this seems to the methods in use today to extract money from reluctant hands!"

"An Old Subscription List," verses 21-29. This heading is the happy title which Dr. Alexander MacLaren gives to his exposition of this chapter.

"Let each man do according as he hath prospered in his heart," wrote Paul to the Corinthians; "Not grudgingly or of necessity, for God loveth a cheerful giver." The men and women on this old subscription list fulfilled that injunction of Paul. They came—a great crowd of willing givers, "every one whose heart stirred him up, and every one whom his spirit made willing," laden with gifts needed for the building of God's house and for "the holy garments," the garments consecrated for use in the sanctuary.

"The world asks, 'How much does he give?' Christ asks, 'Why does he give?'" John R. Mott.

"They were refugees. Where they were living in the wilderness, where there were no stores or workshops. Materials for the tabernacle must come from their private hoards. From Exodus 12:35, 36 we learn that the children of Israel on leaving Egypt asked of the Egyptians 'jewels of silver and jewels of gold, and raiment; and Jehovah gave the people favor in the sight of the Egyptians, so that they let them have what they asked. And they despoiled the Egyptians.' These treasures now the people poured out for Jehovah's use. Every gift was a sacrifice. It could not be replaced.

There are 121 languages spoken by the 461,000,000 inhabitants of Europe.

Vast Wool Trade

Two-Thirds Of The World's Wool

Produced In British Empire
Nearly one-half of the world's raw wool, a survey by the Empire Marketing Board shows, and more than two-thirds of the wool entering world trade is produced within the British Empire.

Concerning Canadian production, the survey, a neatly printed volume of 200 pages, says that appreciable progress has been made since 1924, though the high point reached just after the war has not since been attained. The sheep population is increasing steadily, and there is no reason to doubt a slow upward trend in wool production. Quebec and Ontario together are responsible for about one-half the Canadian clip, but their share has been gradually diminishing, with that of the Western Provinces increasing. The sheep population of the world is estimated at nearly 800,000,000, of which about one-third are in the Empire.

Recipes For This Week

(By Betty Barclay)

FIN WHEEL BISCUITS

- 2 cups special cake flour, sifted.
- 4 teaspoons baking powder.
- 1/4 teaspoon salt.
- 1/2 cup butter or other shortening.
- 1/2 cup milk.
- 1/4 cup brown sugar, creamed.
- 1/2 cup pecan meats, chopped.

Sift flour once, measure, and baking powder and salt and sift again. Cut shortening, add milk gradually until soft dough is formed. Roll 1/4 inch thick on slightly floured board. Place greased muffin pan cut-outs up. Bake in moderate oven (375 degrees Fahrenheit) 30 minutes. Makes 12 biscuits.

ORANGE BLAND MANGE

(Serves 6-8)

- 1 1/2 cups evaporated milk.
 - 1/2 cup sugar.
 - 1/4 teaspoon salt.
 - 4 tablespoons cornstarch.
 - 1 1/2 cups orange juice.
 - 3 tablespoons orange rind.
- Heat milk in double boiler. Mix sugar, salt and cornstarch. Blend with part of orange juice. Add with remainder of orange juice. Stir frequently. Cook until smooth, stirring frequently. If orange juice curdles, milk, beat with whirl type beater. Pour into individual serving dishes and chill. If desired to mold, increase cornstarch 1 tablespoon.

Settlement Plan

Saskatchewan Families Taking Advantage Of Government Scheme

Out of 507 families approved for the Saskatchewan Government land settlement scheme a total of 318 had actually gone to farms up to August 6, according to a statement issued recently.

Further classification of this number showed that 125 families had taken up residence on purchased land and 193 on homesteaded lands.

Figures for the cities were: Regina, number approved 136, actually gone 58; Saskatoon, number approved 298, actually gone 172; Moose Jaw, number approved 79, actually gone 56. Origin of other families included in the settlement movement were: Arcand, 1; Yorkton, 1; Estevan, 10; Carleton Place, 1; Indian Head, 1; Edmondville, 1; Vonda, 1; Sutherland, 4; Weyburn, 8; Gravelbourg, 1.

Trials Of A Newspaper

The following item appeared in The Journal, Bates County, Georgia: "We do a good business Saturday. Justiced type that cost 50, put in 860 worth of new type and collected 81 subscribers. We tried 'em on our steam last week but had little success. This week we call for peanuts on subscription. This is as far as we are going. Don't want any hickory nuts!"

An unwelcome guest is one of the best things going.

"Can't you give up drinking for my sake?"
"Who said I drank for your sake?"
—Allie for Allie, Stockholm.

REACH HIGHEST ALTITUDE EVER ATTAINED BY MAN

Cavallero Di Monsarano, Italy.—Auguste Piccard and Max Cosens came down to earth Thursday afternoon, August 18, having gained on the world from the greatest altitude ever attained by man—more than 10 miles.

When they landed they were somewhat shaky, very tired, and exceedingly moist. Swarms of persons, including government officials who came by aeroplane, descended on them, but neither Piccard nor Cosens was in a mood to accept applause.

Professor Piccard made certain the balloon which had taken him into the stratosphere was well cared for and that his delicate scientific instruments, which may have recorded evidence to indicate whether the universe is finite or infinitely infinite.

Then he telephoned his wife, who until recently had been reluctant about allowing him to repeat the dangerous journey, and told her the first stratosphere flight last year. After that he revealed a little about his amazing experience.

He said that three hours after they took off Thursday morning, August 18, from Dufour, across the Alps in Switzerland, they reached their maximum height. From that vantage point the world was a strange looking place. Landmarks were indistinct and maps were of no use.

Only the large lakes below him served to indicate to Professor Piccard exactly what part of the earth was over. His instruments showed that the balloon was over Lake Garda, 12 miles northwest of this village, and decided to land. It took him more than two hours to bring down his balloon.

"We are very well satisfied with our flight," the professor said, while hundreds of gaping farmers stood about staring at the men who had been far above the rain and the clouds in a little aluminum ball attached to a balloon.

Their altitude was 16,700 metres, or 54,775 feet. On the professor's first flight last year the top height was 13,785 feet.

Professor Piccard, 48 years old, lean, his head crowned by a shaggy mass of hair, and his 25-year-old assistant, took off at 5:08 o'clock Thursday morning, August 18, (11:08 p.m. Wednesday, August 17, eastern standard time). They were in the air about 12 hours.

When the balloon had been deflated after the landing here and safely folded up, the instruments had been taken care of, the professor and his assistant motored to Desenzano.

It was almost midnight when they left. Their every move had been watched by the crowds of stocky spectators to whom this was a most extraordinary matter. The professor had not newspaper readers and they had no idea what the queer globular carriage represented.

Along about midnight the balloon and aluminum ball were loaded into an air force truck and hauled to the aviation school in the town where they were placed in a hangar. Neither Piccard nor Cosens would leave the spot until their apparatus had been stowed away.

Finns Leave For Russia

Hundred From Ontario Confident Soviet Will Supply Work

Halifax, N.S.—Sporting red silk scarves attached to their chests by a small star with a sickle and hammer device, 100 Finns from Ontario set sail on the S.S. Kangshoan for work in Soviet Russia.

With few exceptions they declared themselves confident work would be provided for all as soon as they arrived in the land of the Soviets.

To Test New Airplane

Berlin, Germany.—An aeroplane which will retrace the steps of aviation to study the flight of birds is awaiting a trial at Tempelhof Aerodrome. It has a wing structure approximating the wings of a seagull and its aim is to secure greater stability in the air. Hans Richter, pioneer glider flyer, is the designer.

Wish Coal For Winnipeg

Winnipeg, Man.—A trial shipment of 1,500 tons of Welsh anthracite coal to heat Manitoba homes has arrived in Fort William and will soon be brought to Winnipeg by rail, according to an announcement made by the Winnipeg Supply and Fuel Co. It will replace hard coal formerly imported from the United States. It was stated.

W. N. U. 1956

Mounties May Police B.C.

Would Bring Whole Of Western Canada Under Federal Force

Victoria, B.C.—Consideration of turning over to the Royal Canadian Mounted Police the policing of British Columbia is under consideration of the department of the attorney-general. It was definitely learned here. The development is one of the results of the Kilduff report on British Columbia finance. It was stated.

The arrangement proposed provides the abolition of the British Columbia Provincial police and 39 municipal police forces, all of which cost \$170,000 annually. City police forces of Vancouver and Victoria would be continued as at present.

Completion of an agreement for policing British Columbia by the Royal Canadian Mounted Police would bring the whole of western Canada under the federal force. Saskatchewan turned over its policing to the Royal Canadian Mounted Police almost four years ago, while Alberta and Manitoba provincial forces were absorbed this spring.

For National Bank

Native Sons Of Canada Want Revision Of Canadian System

Quebec, Que.—The Native Sons of Canada want revision of the Canadian banking system. After lengthy discussion, the organization in convention here adopted a resolution embodying the following points.

(1) Creation of a national banking commission to have discretionary powers over all matters pertaining to all Canadian banks;

(2) Creation of a Canadian national bank, to serve as a reserve bank;

(3) Greater protection for bank shareholders together with stricter government surveillance of banking practices.

Lack of interest shown by Canadian banks in Dominion and related to some industrial and business firms to declare a holiday on that day was deplored in another resolution adopted by the convention.

S.S. Pennyworth Arrives

Docks At Churchill With Miscellaneous Cargo

Churchill, Man.—With a miscellaneous cargo in her holds consigned to western Canada points, the British steamship "Pennyworth" docked here after an uneventful voyage from Liverpool. Unloading operations are all going on today. Later she will be loaded with 250,000 bushels of grain for the return voyage to the old country.

Five freight steamers will call at Churchill, the new Canadian ocean port of Hudson Bay, during the present season of navigation. It was announced today, August 17, by Hon. R. J. Manion, Minister of Railways and Canals.

Estate Will Be Auctioned

Large Property Of Earl Of Egmont To Be Sold

London, England.—Calverton estate, a property in Buckinghamshire belonging to the Earl of Egmont, is to be sold by auction. It was announced recently.

The youthful "Rancher Earl," who succeeded to the title on the death of his father four months ago, has returned to Canada and is living on the Alberta ranch at Priddy, where "Mr. Percival" farmed until he became the 10th earl in 1920.

Calverton estate covers about 461 acres, with a small residence, three farms, 32 country cottages and some valuable building land.

New Shotgun Device

Youthful Inventor Claims Weapon Can Fire 400 Shots A Minute

Chicago.—A 20-year-old junior college student is inventor of a device which he claims will convert an ordinary shotgun into a death-dealing device capable of shooting its customary ammunition at the rate of 400 shots a minute—and has pledged himself to keep it from gangsters and criminals.

The inventor, Charles A. Michal of suburban Elmwood, said the device can easily be attached to any shotgun. It has been submitted to local police departments for thorough tests.

African Explorer Dead

New York.—A special cable to the New York Times, reported the death of Bournonville, England, of Capt. W. G. Weatherly, geographer and African explorer, who discovered the source of the Congo at the age of 72.

Mutual Preferences

Committee On Foreign Relations Makes Recommendations

Victoria, B.C.—The Imperial Conference committee on foreign relations is understood to include in its report recommendations that:

(1) No treaty obligations into which the empire countries might enter in the future should be allowed to interfere with any mutual preferences which the governments of the commonwealth might agree upon.

(2) The empire countries will free themselves from any existing treaties as might interfere with mutual preferences which may be agreed upon.

The United Kingdom has trade pacts giving most favored nation treatment to Soviet Russia and Argentine. No treaties, though, are specified in the report.

Lancaster Is Acquitted

British Flyer Is Freed On A Charge Of Murder

Miami, Fla.—Captain W. N. Lancaster, British flyer, was freed on a charge of murdering Haden Clarke, young swimmer and his sister, Wednesday, August 17, by a verdict which precipitated a court room demonstration that threatened to go beyond the control of bailiffs.

The 12-man jury deliberated four hours and 48 minutes before acquitting him on one complete ballot.

He had been on trial since August 2 in one of the most sensational hearings in the history of South Florida—a trial which brought out the secret love lives of himself, Haden Clarke, and Mrs. Jessie M. Keith-Miller, Australian aviatrix in full flight.

Export Flour Unloaded

First Shipment Arrives At Churchill For Overseas

Churchill, Man.—In the presence of several Canadian National Railway officials the first Canadian flour ever shipped out of the north was unloaded from a special train in the new freight shed.

The shipment comprised 31 cars from Robin Hood Mills, Saskatchewan, and Moose Jaw, destined overseas.

ITALY PLANNING TO SCRAP THIRD OF ENTIRE FLEET

Rome, Italy.—One hundred and thirty thousand tons of Italy's fighting ships—practically one-third of the entire navy—will be retired under a programme beginning August 25. The purpose is to save money.

When the programme has been completed, Italy will be without a single battleship. The "Andrea Doria," 22,700 tons, and her sister ship, the "Dulio," which were rushed to completion in 1915 when Italy entered the world war, will be placed out of commission. Under the Washington treaty, Italy has the right to 10,000 tons of battleships, but she has elected to disregard this category in favor of heavy and light cruisers.

A report presented to the disarmament conference showed that the whole Italian navy totals 404,000 tons, including 20 ships still under construction.

The need for economy was indicated by the fact that some new ships are intended for retirement. These are four of the 12,000-ton destroyers of the newest Italian type.

CALLS FOR MORE TREES

Hon. James F. Bryant, as Chairman of the Saskatchewan Commission on Conservation, is advising the farmers of that province that the present is the time to go in for a tree planting campaign. He says planters should use the Caragana bushes to stop soil drifting.

Retrenchment Programme

Manitoba Government Plans Drastic Cut In Expenditures

Winnipeg, Man.—Government members of the Manitoba legislature met in the first caucus since the election, to pass on a retrenchment programme planned by the government of Premier John Bracken, involving a saving of somewhere between \$500,000 and \$1,000,000.

Previously, Hon. D. G. McKenzie, Minister of Agriculture and Hydro, had announced for purposes of economy his department will not send an exhibit to the Royal Winter Fair at Toronto this winter, this move will result in a saving of some \$5,000.

Falling revenues since the estimates were submitted in the legislature last spring have made necessary drastic curtailments in Manitoba government expenditures. For instance, more than 3,000 fewer passenger cars have been operated in Greater Winnipeg this year, and 12,000 fewer passenger cars for the whole province, according to figures on motor vehicle licenses obtained by the Manitoba tax commission.

Irish Tariff War

President De Valera Showing Little Interest In Question

Dublin, Ireland.—If fresh overtures are made for negotiations to end the tariff war between the Irish Free State and the United Kingdom, they must come from London. This is the general understanding in official circles here.

Concentrating on internal problems, President Eamon de Valera has shown little interest so far in the question of reopening negotiations. He is said to be well satisfied with the difficulties confronting his new policy, but that retaliatory tariffs on both sides have devaluated trade across the Irish Sea. Default of Free State land annuities to Britain started the difficulties.

Explorer Will Be Honored

Toronto, Ont.—Etienné Bruie, French explorer, who came down the Humbler River here in September, 1613, the first white man to look upon Lake Ontario, will be remembered in a memorial to be unveiled here September 17. Plans have been completed for the unveiling, which will be under the auspices of the Women's Canadian Historical Society.

OUR SAILOR KING

A unusual picture showing King George at his favorite sport. He is seen aboard his yacht "Britannia" near the racing at Cowes, during which the royal craft carried off first honors. His Majesty is shown leading a hand at the races.

Grant Provided For

Money For Grain Show Will Be Available As Required

Ottawa, Ont.—The balance of \$140,000, which remains of the Dominion grant for the world grain show, to be held in Regina next year, will be made available as required.

The vote was put in the estimates last year for \$150,000, and \$10,000 of this has been paid over. This has been announced at the Department of Agriculture.

The management of the fair is in the hands of an executive committee headed by Hon. W. C. Buckie, Minister of Agriculture in Saskatchewan.

Braving Ocean In Canoe

Two Scandinavian Sailors Leave Montreal For Vancouver

Montreal, Que.—Braving the dangers of the Atlantic and Pacific oceans, two experienced Scandinavian sailors left here August 16 in a 18-foot canoe en route to Vancouver via Cape Horn. The navigators, Holge Borup, 42, Danish sailor and newspaper editor, and Harold T. Jensen, 38, a veteran ship's officer, expect to complete the journey in about two years.

The craft, an Ontario product, is equipped with a sail, outrigger and rudder and will carry the two men, who weigh about 200 pounds each, together with 800 pounds of equipment made up of a tent, clothing, fishing line, camping utensils and modern navigation instruments.

The two plan to sail down the St. Lawrence River, through the Gulf and along the coast of the Maritime provinces and New England states to Boston and New York, where stops will be made. Their itinerary will then take them to Key West and thence to Panama, Central America and on.

From the Pacific Coast they intend entraining to the Thunder Bay district for an inland water voyage back to Montreal.

Jensen navigated the Amazon River alone from its source to the sea in 1924.

German Political Situation

Hitler Says He Will Not Use Storm Troops To Gain Power

Berlin, Germany.—Chancellor Franz von Papen has received assurances Adolf Hitler will not use his storm troops to seize political power, but in any event he will not hesitate to suppress any revolt by force of arms.

The chancellor made this assertion in an interview in which he vigorously reiterated Germany's demand for equality in armaments with other nations, declaring the fatherland no longer could submit to being treated a second-class nation.

Although the cabinet situation still is in a state of flux and there is no telling who will rule Germany after the new Reichstag has been called here this month, the chancellor appeared serenely confident his government would stay in power.

Asked whether he expected to be back next Christmas he said: "We shall be in office for a long time."

Grant Provided For

Money For Grain Show Will Be Available As Required

Ottawa, Ont.—The balance of \$140,000, which remains of the Dominion grant for the world grain show, to be held in Regina next year, will be made available as required.

The vote was put in the estimates last year for \$150,000, and \$10,000 of this has been paid over. This has been announced at the Department of Agriculture.

The management of the fair is in the hands of an executive committee headed by Hon. W. C. Buckie, Minister of Agriculture in Saskatchewan.

CONSIDER PLANS FOR FINANCING DIRECT RELIEF

Winnipeg, Man.—Special sessions of the three prairie legislatures may be called this fall to consider a plan to finance direct unemployment relief if the Federal Government does not continue arrangements made last fall, according to reports in official circles here.

Under an agreement the Federal Government, province, and municipalities each were to pay one-third the cost of direct unemployment relief, but the Federal Government is not agreeing to assist the province to finance its share. The Dominion Government last notified the province that it did not propose to continue this arrangement after April 1.

Each of the prairie governments is confronted with the situation of being unable to borrow for relief purposes except at bank overdraft, and under the circumstances this is not possible.

Calgary, Alberta.—Representatives of the four western provinces and cities may meet Premier H. B. Bennett to discuss unemployment relief when the Prime Minister comes to Calgary about the end of August.

Provincial delegates had planned to meet the Prime Minister at Ottawa, but following a report that Mr. Bennett would be in the city in less than two weeks, it is expected representatives will seek an appointment here.

DELEGATES ARE ENTERTAINED AT THE CAPITAL

Ottawa, Ont.—Tributes to the people of Ottawa for the hospitality they have extended to the delegates attending the Imperial Conference and to all the efforts put forward to make the sojourn of the conference pleasant and comfortable were voiced at the luncheon tendered by the mayor and corporation of the city to the delegates.

The beauties of Ottawa, its natural environment and its dignified public buildings, had impressed the visitors.

Sean T. O'Kelly's remarks were also in lighter vein. He felt, he said, that he dare not refuse to speak at the luncheon because the Irish Free State was "too much heard, and gets very little publicity."

"We have to fight hard for the small share of sunlight given to us," Mr. O'Kelly declared, "and if I lost this opportunity I would soon hear of it."

Ottawa, said the Free State leader, was "almost too beautiful a setting for the sordid occupations of an economic conference."

W. C. Hastings of the South African delegates, Rt. Hon. J. C. Aldrich of New Zealand, Hon. F. C. Aldrich of Newfoundland, Hon. H. W. Moffat of South Africa and Sir Atul C. Chatterjee of India also spoke.

Speeches were closed by Rt. Hon. R. B. Bennett, who thanked the city and the people of Ottawa for their co-operation in the work of making the visitors feel at home.

French Steamer Sails

Leaves Churchill Bound For France With Cargo Of Wheat

Churchill, Man.—While the holds of the British steamer "Pennyworth" are being filled with flour, rolled oats and wheat at this new northern port, the French steamer "Sierren" is being loaded with wheat for shipment northwest through the waters of Hudson Bay with a cargo of wheat bound for Le Havre.

The "Sierren" was the first boat to arrive this season and the first to leave.

Her load of 250,000 bushels of No. 1 Canadian wheat is consigned to L. Dreyfus, the French grain importer and before leaving Captain P. A. Mege indicated the Dreyfus company would likely send in more ships during the season.

The "Pennyworth" brought the first wheat freight to enter the new port, 500 tons of miscellaneous goods. It included Scotch whisky for the Manitoba and Saskatchewan liquor commission, champagne, pianos, motor oils and electrical equipment. The goods will move out by rail shortly to Regina and Saskatoon.

Britain Would Tax Road Users Heavily

Railways and Highway Authorities Propose Higher Levy

London, England.—Heavy additional taxation on users of the public highway is proposed in the report of a joint conference between railway and highway authorities in Great Britain, issued recently.

"Mechanically propelled vehicles" should pay \$240,000,000 a year to toward the cost of roads, the report recommends. Of this commercial vehicles should pay \$94,000,000 and others \$146,000,000. The report urges a much heavier tax on commercial vehicles, particularly the larger type.

Not Afraid Of Weight

Toronto, Ont.—Life guard Tom McQuay is not afraid of size when it comes to rescue some one in distress. Hearing cries for help as he patrolled his section of the lakefront here, McQuay responded and brought to shore William Curry, 47, whose estimate of his in bathing suit was 315 pounds.

Faithful To Duty

Toronto, Ont.—Faithful to the last moment of a quarter century's service, Engineer Dave Martin fought off a heart attack as he brought his fast Canadian National freight train in from Toronto from South Perry Sound. As the locomotive pulled into the Union Station, Martin fell dead on the floor of his cab.

Date Of Race Advanced

Hamilton, Ont.—At the request of the City of Hamilton, the first of the Harnsworth trophy races on Lake St. Clair will be run on Saturday, September 3, instead of the previous Friday, as originally scheduled.

Harvesting Slow in Russia

A serious lagging in the grain harvest, combined with difficulties encountered by the government in making collections from the peasantry, was officially acknowledged on Wednesday. Published figures showed that with the end of the harvest period only about three weeks off, 95,465,000 acres, or only 45.2 per cent of the sown area in the Soviet Union, had been reaped by Aug. 5, as compared to 124,787,500 acres, or 57.4 per cent, on the same date in 1931.

Although the harvest was expected to be ended in those areas by this date, the Ukraine had harvested only 65 per cent of its area and the north Caucasus only 63 per cent. Similarly, July collections in both sections were characterized as "very bad" and no improvement was noted during the first few days of August.

The newspaper blame the situation on poor organization of the work and of the collective farm leadership in the Ukraine, citing how the chairman of the regional party conference was severely reprimanded for carelessness and inattention to duty.

The State farms, which are those operated by the government, with salaried labor and which are supposed to be models of Socialist agriculture, showed the lowest percentage of harvesting, which amounted to 33.3 per cent of their sown area, or 6,872,500 acres. The collective farms harvested 67,080,000 acres, or 46.9 per cent, and individual peasants 19,572,500 acres, or 44.8 per cent.

In Memoriam

In loving memory of Mrs. Howard Smith Sr. who departed from this life August 24, 1927.

Her memory is as dear to-day,
As in the hour she passed away.

The family.

Medical Service Arranged
Medical service arranged for Champion and district during Dr. Freeze's absence.

At the request of Champion residents Dr. C. Galbraith of Vulcan has agreed to visit Champion as follows:

Friday evening until Saturday noon and Tuesday evening until Wednesday each week. Phone 44, the residence of Mrs. Woodhull.

Frank Dalsin and family of Edmonton are visiting Mr. and Mrs. Stove Path.

A Time For Careful Thought

Unless he formulates and follows a new economics it is only a question of time until the farmer as a self-respecting freeman will take his place in the museum of vanished types. In this new economics the principles of co-operative action will play a decisive role.

If the farmer is to cease being the beaten and buffeted victim of modern industrial civilization, if he is to become the master of his own economic and cultural destiny, he must organize as the rest of economic Canada has organized. If he does not he will be lost in the shuffle.

The Alberta Pool Elevators represent the foremost step in the co-operative efforts of Alberta farmers. Every Alberta grain grower should see that this Alberta co-operative organization is assured the greatest possible measure of success.
